

## What Do We Offer

### Fast, Accurate Face ID

Biometrics authentication ensure personnel and no buddy-punching can happen.

### Auto Calculations

Employees working hours, lateness, overtime and more, are tracked and calculated automatically.

### Big Data Visibility

Even across multiple workplaces, employees' movements and data are highly visible via big data dashboards and reports.

## Accessible Anytime, Anywhere

Our cloud-based HR time & attendance solution, **BAS-Attendance**, is a proven, highly configurable system, which is capable of tracking staff movements, working hours and multiple workplaces under a single system.

## Designed with Experience

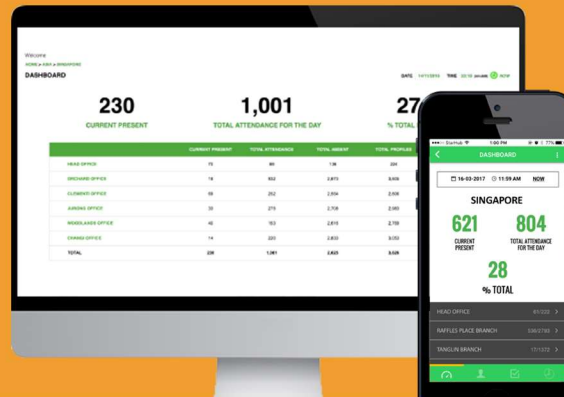

Built with great features such as centralised employees databases to prevent duplications, highly configurable shifts and overtime, timesheet approvals, useful reports and more.

## True Big Data Solution

Leveraging on big data technologies, you will be able to have an overview of real-time statistics, and the added capability to drill down to individual information and movements.
